RE: Proceedings of the Conference on P-Adic and Non-Archimedean Analysis
Edited by: Martin Berz and Khodr Shamseddine

The Editors invite you to submit a manuscript to the above volume, which will be published by the AMS in our Contemporary Mathematics (CONM) book series.

I am sending you information regarding the volume and instructions on preparing your final manuscript.

- ◆ Research manuscripts are preferred but outstanding expository manuscripts may be acceptable.
- ◆ Only final (detailed) versions will be considered; abstracts and summary (preliminary) material are not acceptable.
- ◆ All manuscripts will be refereed.

AUTHOR RESOURCE CENTER (ARC): <http://www.ams.org/authors>

- ◆ Your final manuscript should be prepared using LaTeX or AMS-TeX.

The ARC contains important information and documents related to publishing with the AMS. To help you prepare your manuscript correctly for publication, we recommend that you visit the ARC, in particular, the following sites:

Why LaTeX – <http://www.ams.org/jourhtml/latexbenefits.html>

You will find information on why it is beneficial for authors to use LaTeX for manuscript preparation.

Author TeX Packages - <http://www.ams.org/authors/procpackages.html>

The AMS offers author packages for use with AMS-TeX and AMS-LaTeX (compatible with LaTeX2e), which properly format your manuscript. You should download the most up-to-date version of the Contemporary Mathematics (Proceedings) package. **Use of these packages is strongly recommended. Please do not use magnification or a \documentclass size option. The type size should be 10pt.**

Creating Graphics – <ftp://ftp.ams.org/pub/author-info/documentation/creating-graphics.pdf>

You will find instructions on creating graphics that are acceptable for publication. Please note that if your graphics are not prepared correctly, you will be required to fix them and resubmit your manuscript.

Author FAQ – <http://www.ams.org/authors/author-faq.html>

This contains answers to frequently asked questions.

MANUSCRIPT SUBMISSION TO THE EDITORS:

- ◆ **The deadline for manuscript submission is XXX**
- ◆ A PDF or PS version of your original manuscript should be submitted to:

EDITOR – EMAIL ADDRESS

- ◆ Please notify one of the editors if you do not plan to submit.

INSTRUCTIONS:

- ◆ CONM is an author-prepared series which means that authors are responsible for the proper formatting of accepted manuscripts. The AMS will produce the volume directly from camera-ready copy provided by authors using output from your .dvi file. **We strongly recommend the use of the Contemporary Mathematics (Proceedings) author package** <http://www.ams.org/authors/procpackages.html>.
- ◆ If you do not use the author package please be sure that the style you use remains consistent throughout the manuscript (the type size must be 10pt.) and that the required page dimensions are met:
 - Type block measures 5 x 8.4 inches or 12.7 x 21.4 centimeters.
 - NOTE that the FIRST page of the text, including the title, should measure only 6.5 inches or 16.5 centimeters in length.
 - Please include running heads when measuring text.
 - Do not include page numbers at the bottom of a page when measuring.

We recommend that you obtain the page layout template which will give you a visual guide to the proper page dimensions. It is available from: <http://www.ams.org/authors/LayoutTemplate.html>

- ◆ Please include a footnote containing the 2000 Math Subject Classification Numbers which are applicable to your paper. The list of numbers is available from: <http://www.ams.org/msc>.

If you have technical questions, you should first try the AMS web site: <http://www.ams.org/authors/author-faq.html>. If you do not find the answer(s) you need, you should contact our Technical Support group via their special email address: author-support@ams.org making sure that you include CONM/Berz in your message to identify this volume.

Manuscripts that are not prepared according to the instructions or contain unacceptable graphics will be returned to authors for reformatting. Please be sure that you do not destroy any relevant electronic files. If you are unable to fix your manuscript, please contact the editor(s) of the volume for assistance.

The final responsibility for preparing manuscripts according to the instructions remains with the editor(s) of the volume. The AMS reserves the right to exclude from the volume any manuscripts that are not submitted in the appropriate form.

GRAPHICS: Detailed instructions are available on the AMS web site:
<ftp://ftp.ams.org/pub/author-info/documentation/creating-graphics.pdf>

- ◆ Some important notes are:
 - * line weights (width) must be at least 0.5pt
 - * screens must be between 15% and 85%
 - * figures should be created at the size they are to appear in the publication (no scaling)
 - * use of color graphics should be avoided, or used only if it is mathematically essential to the paper. Those who wish to use color graphics must notify the AMS prior to manuscript submission. Authors are required to pay for all costs associated with producing color graphics.
 - * **color graphics to be printed in black and white or grayscale should be converted to black and white or grayscale before submitting to the AMS.** Do not create a graphic in color if it is not to appear in color in the published product. These graphics should be saved as grayscale.
 - * \special commands must be compatible with Radical Eye Software's dvips. We recommend using the graphicx package to include graphics

PERMISSIONS: <http://www.ams.org/authors/permissions.html>

- ◆ If you are using any of your own material that has appeared elsewhere, you **MUST** obtain permission from the original publisher, unless you retained copyright.
- ◆ You **MUST** obtain permission to use another person's work, including figures, pictures, and quotations, whether or not it has been previously published.
- ◆ Authors are responsible for obtaining written permission(s), free of any restrictions which may limit the AMS's ability to produce, publish, promote, and distribute the volume in which your paper may appear, and forwarding these to the AMS along with your manuscript. Any permission which includes a restriction may result in the material being omitted from the volume.
- ◆ Permission request forms are available from: <http://www.ams.org/authors/permission-form.html>
- ◆ If permission is not obtained prior to production, publication of the volume in which your paper will appear will be delayed.

MANUSCRIPT ACCEPTANCE/FINAL SUBMISSION TO THE AMS: Upon acceptance of your manuscript by the editor please do the following:

- ◆ Verify that the type size of the text of your manuscript is **10pt**. You should not submit a manuscript with any other type size.
- ◆ Please remove any magnification commands (AMS-TeX) or \documentclass size options (LaTeX), and if using the series specific author package, all changes to page dimensions have been removed.
- ◆ Carefully proofread your manuscript prior to submission. The AMS does not proofread or provide proof copy of manuscripts prior to publication.
- ◆ Once properly formatted, send the final hard copy (required) along with a completed author checklist (<http://www.ams.org/authors/checklist.html>) to my attention. This should be done no later than four weeks after final acceptance. Your hard copy must match your final .dvi file.
- ◆ Submit your .dvi, .eps and .tex files to the AMS. Submission information is available on the AMS web site: <http://www.ams.org/authors/submitelecms.html>

NOTE – Production of the volume will not begin until we receive **both** the hard copy and electronic submissions for all accepted papers.

GENERAL INFORMATION:

- ◆ Each author receives a complimentary copy of the volume.
- ◆ Fifty offprints of each article will be supplied gratis (to be divided among authors). You will receive an offprint order form when production begins. You may order additional offprints or covers at that time.
- ◆ Please notify us of any changes in your address
- ◆ I may be contacted via e-mail: cxt@ams.org or phone: 1-800-321-4267 (ext. 4051).
